Cross platform control app for Zone series

Optimal Audio

## FEATURES

- Simple and intuitive customisable user interface
- Accessed via the browser on any device on any platform
- Control for all connected sources in all zones
- Presets and time of day routines
- Access all functions for complete system set up including EQ, routing, ducking, limiting and more
- Customisable zone and input naming
- 3rd party device control over OSC via Ethernet

Traditionally, the control and operation of commercial sound systems has been a complicated inconvenience to many users, who just want the system to work.

WebApp has been carefully designed to bring the essential functions and daily operation of your sound system to your smartphone, tablet or laptop.

The responsive and intuitive interface lays out the fundamental controls in a clean, accessible format with the deeper, lockable layers for system configuration available for integrators and system commissioners.

Zone specific and global presets for manual and time of day triggers are

easily configurable, and complete system configuration can be achieved through WebApp with onboard ducking, EQs, limiters, advanced signal routing and more.

WebApp also allows for the system configuration files within Zone series products to be saved and easily replicated across multi-site installations.

Hosted by the Zone series, there's no installation required - just open a browser on a smartphone, tablet or laptop connected to the same network, enter the address and you're in.

## APPLICATIONS

Cafes

Bars/  
Restaurants

Retail

Wedding  
Venues

Hotels

Education  
Facilities

Houses of  
Worship

Corporate  
Offices

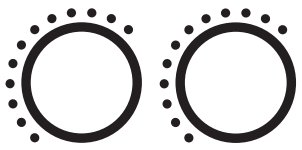

Museums

Fitness Studios

Residential
